

X•Alert

by X-Sensor Technologies

X•Alert is a smart comprehensive surveillance and security tool that automatically starts intelligence collection based on specific (associated with violence) triggers.

Trigger based Situational Awareness + Evidence Collection.

With X•Alert you receive increased situational awareness, real-time factual predictive analytics as well as digital forensic evidence.

Trigger based IMSI + Wireless Attribute Collector

Capturing digital forensic evidence and real-time situational awareness using an IMSI + Wireless Attributes Collector only when it is triggered.

Because a traditional IMSI Catcher / Collector affects mobile devices on the wireless network, and a man in the middle is not the solution within public spaces.

We use the PBIC IMSI + Wireless Attribute Collector in combination with multi-layered Gunshot or Violence Recognition as a surveillance equipment trigger. Upon accurate 80%+ recognition of Gunshot and Violence sound, the PBIC Intelligence + Evidence Collector is unsupervised and automatically launched.

Resulting in the real-time collection of fact-data identifiers within seconds of launch, such as: MAC, TMSI, IMSI, IMEI and other attributes.

Optionally, it can be equipped with pre-recording evidence collection recognizing when patterns of life deviate, determine a crowd size or to predict escalations.

X•Alert › Increase your Situational Awareness

X•Alert is a weather resistant discrete modular, portable, surveillance equipment that is designed to be Plug & Play deployed at: Crime Hotspots – Nightclubs – Campuses & Schools – Town Halls – Community Buildings – Public Parks & Playgrounds – and more.

By detecting both visible and invisible patterns, the X•Alert provides your officers an enhanced 360 degree situational awareness before they reach the crime scene.

Determine whether registered violent offenders or fugitives are present at or around the crime scene. Discover who the suspects, bystanders and witnesses to a crime are, and become aware of multi-level connections that were previously undiscovered.

With X•Alert you no longer have to work around camera blind spots. It detects and recognizes everyone in the proximity of X•Alert Plug & Play systems.

X•Alert › designed to reduce violence, prevent assaults on officers, and increase the collection of digital forensic evidence.

An extra tactical layer for your special missions.

X•Alert - includes a comprehensive extensible web-based dashboard that is encrypted and securely connected to the on-site equipment. Within the user-friendly dashboard, alerts can be configured based on risk classifications, automatic correlations, pattern recognition or other settings.

Contact us for all the possibilities of the trigger based X•Alert technology which can be fully personalized to your requirements and needs.
