

X•Aware Portable – Drone

by X-Sensor Technologies

X•Aware enables your security and close protection team to collect real-time intelligence + situational awareness within the perimeter.

In addition to preventive scanning for possible threats within one or an unlimited number of spaces, where close protection officers have a discreet and rapid insight into the situation.

X•Aware also offers a Drone solution, in order to gain more insight into possible threats outside the property, as a preventive and rapid perimeter security scan.

X•Aware Portable – Drone is a multiple RF (Radio Frequency) Scan system that is portable in a small backpack, carry case or under a drone / UAV operating the RF (Radio Frequency) spectrum. For optimal compatibility the drone module is designed for use across multiple unmanned aerial vehicles (UAV).

Portable + Drone Deployment Possibilities

Where the X•Aware Portable can be used to real-time obtain factual insight within a property whether a known threat is present.

Does the X•Aware Drone capability have other advantages, such as:

- Quickly gain insight into remote perimeters by scanning mobile devices, vehicles, GPS trackers, smart wearables, and other wirelessly connected devices.
- Protect your own perimeter periodically or constantly by scanning for unknown and unauthorized wireless devices and vehicles connected to the RF spectrum.
- Prior to a visit, quickly and discreetly gain insight into whether any blacklisted devices or invisible threats are present.

Contact us for all X•Aware Drone possibilities and deployment benefits.

This way, your Close Protection Security Officers get increased 360 degree situational awareness and real-time insights into every type of situation.

With X•Aware Portable - Drone you reduce camera blindspots and minimize the information from being lost during shift changes.

The X•Aware Portable - Drone is available as:

1. 100% Fully Passive
2. Partly Passive + Active

100% Completely Passive

Detect mobile devices, smart wearables, infotainment systems and vehicles passively within the WIFI - BLE - GSM - TPMS spectrum.

Partly Passive + Active

Increase intelligence collection within the RF Spectrum by additionally detecting 4G LTE + 5G Ready connected devices and GPS trackers.

Optionally, X•Aware can be delivered as a comprehensive Tethered Drone + RF Sniffing solution. A tethered Drone (UAS) can be quickly deployed anywhere and remain in the air for extended periods of time with the user having 3 kilometers or more of constant situational awareness.

Comprehensive Portable + Drone Security Solution

X•Aware - includes a comprehensive extensible web-based dashboard that is encrypted and securely connected to the on-site equipment. Within the user-friendly dashboard, alerts can be configured based on risk classifications, automatic correlations, pattern recognition or other settings.
