

X•Aware Premises

by X-Sensor Technologies

X•Aware provides you with an extra layer of preventive + proactive protection around your premises.

With the unlimited availability of information on the internet and social media, individuals who's addresses were previously unknown are now easily accessible and are at an increased risk if necessary precautions are not implemented.

This is where X•Aware comes in, a Plug & Play + User-friendly addition to traditional security.

Are you aware of what is happening around your premises, 24/7 ?

When it comes to property perimeter protection, estate owners have many options to choose from. Nevertheless, receiving preemptive alerts based on automatic threat detection and risk analytics can prevent potentially life-threatening situations.

X•Aware is designed to also equip your vehicles, offices, yachts and parking garages to enable your security team to recognize patterns even faster.

Prevent camera blindspots around your premises, and prevent information from being lost during security staff's shift changes. Instead X•Aware helps you increase your security staff's real-time situational awareness.

Increase your intelligence to preventively identify and proactively respond to impending intrusions or assaults.

X•Aware – a smart comprehensive sniffer that automatically transmits alerts when Patterns of Life deviate.

Providing a 360 degree Situational Awareness

Enhance the visual of 'invisible' suspicious activity with X•Aware: an addition to traditional security by monitoring the invisible radio frequency spectrum and collecting invisible attributes which are constantly transmitted by every type of device equipped with wireless transmission components.

Such as: Vehicle infotainment, Vehicle e-calling system, Vehicle GPS, Smartphones, Headsets, Earpods, Smart watches, wearables, cameras and so on.

Basically everything that everyone carries with them these days.

By detecting both visible and invisible patterns, the X•Aware provides your officers with extensive real-time situational awareness.

Within the user-friendly AI-architecture dashboard, preventive alerts can be configured based on automatic correlations, risk classifications, pattern recognition or other settings. The dashboard has been developed in such a way that it minimizes false alarms and alerts security staff only when absolutely necessary.

Contact us for a live demonstration of the AI-architecture smart Dashboard.

Designed to keep you, and your loved ones you safe.

We understand that your home is a place to relax and unwind. X•Aware is low profile, compact, plug & play, easy to set-up. We can help design a plan for your high-net-worth home or property to be secure and even be discreet so nothing can ruin your assets. Let us discuss and review your need to protect the assets you own.

X•Aware is also available for Plug & Play installation or portable deployment at entrances of offices, office spaces, schools, campuses, playgrounds, and so on.
