

# **X•Aware On The Move**

**by X-Sensor Technologies**

**Increase your visible and invisible situational awareness while driving or traveling.**

X•Aware gives you an extra layer of preventative protection by providing real-time monitoring of the radio spectrum every time you hit the road.

- Discover if and when you are covertly tailed.
- Identify threats faster by making them visible.
- Recognize threats before they can be executed.

# Receive an alert when you are being tracked

## Are you aware of what is happening around you while driving or traveling?

You are most vulnerable when you are out of your familiar surroundings.

X•Aware > designed to protect you when you're on the move.

X•Aware is a smart comprehensive sniffer that transmits proactive recommendations and pre-emptive alerts when it predicts you are being tracked based on fact data.

By detecting both visible and invisible patterns, the X•Aware provides extensive situational awareness. This allows you to receive constant 360 degree intelligence. With a range of one to three hundred meters, wherever you are.

**X•Aware: an addition to traditional security by monitoring the invisible radio frequency > wireless spectrum.**

## Receive pre-emptive alerts on potential threats

Since hidden security cameras can have blind spots, we offer X•Aware. It constantly scans the entire wireless spectrum unsupervised. With the use of smart techniques, X•Aware predicts a threat level based on factual data.

How it works: X•Aware collects, processes and correlates all kinds of attributes in real-time. These attributes are constantly transmitted by every type of device equipped with wireless transmission components.

Such as:

Vehicle infotainment, Vehicle e-calling system, Vehicle GPS, Smartphones, Headsets, Earpods, Smart watches, Smart wearables, and so on.

It basically collects, recognizes and correlates everything in real time that all vehicles and smart devices are constantly transmitting.

Detection + Identification + Correlation: BLE + WIFI + TPMS.  
Upgradeable with License Plate Recognition + Cellular.

# Designed to keep you safe while driving & traveling.

X•Aware is a discrete modular, portable, security equipment that you can place inside any vehicle. Available in the following sets: In-Vehicle Rear Window – Motorcycle Backpack – Bicycle Pannier – and other Plug & Play Gear.

In addition to the X•Aware – Vehicle model also available as a discreet Travel Kit.
