

X•Aware Technology

Preventive Armored Vehicles Security

Don't miss out on vital intelligence.

Be aware of what exactly happens around the vehicle while driving.

Are you constantly aware of what is happening around the armored vehicle, passengers and the assets to be protected.

Prevent lone or organized assailants from observing and tailing your armored vehicles unnoticed and ultimately posing a threat.

- Automatic alerts to the drivers when they are tracked
- Receive risk and threat analysis notifications remotely
- Identify and recognize threats before they can be executed
- Constantly collect factual situational awareness while driving

X•Aware Technology Capabilities

- Risk-increasing correlations are automatically noticed
- More insights into what is constantly 355/24/7 happening around you
- Receive preemptive notifications when patterns of life suddenly deviate
- Prevent valuable information from being overlooked by camera blind spots
- Minimize information loss during staff shift changes and while traveling
- Receive fact-data predictive alerts based on automated threat analysis
- Real-time 360 degree situational awareness anytime and anywhere

Detection > Collection > Identification > Recognition > Correlation > Prediction
all this combined results in **real-time preventive protection.**

X-Aware > an additional **smart preventive layer for enhanced close protection.**
