

X•Aware Technology

Smart Investigations

An Additional Layer of Physical Forensic Investigations with Smart Cyber-Physical Collected Intelligence.

Want to know who exactly entered your perimeter / property?

Are you aware of what is constantly happening 360° + 365/24/7 around your perimeter or property?

- Discover who entered a perimeter + property and when
- Collect accurate and factual digital forensic evidence
- Identify suspects based on their wireless identifiers
- Recognize and verify suspects via their identifiers

X•Aware Smart Investigation Capabilities

- Risk-increasing correlations are automatically noticed
- More insights into what is constantly 355/24/7 happening around you
- Receive preemptive notifications when patterns of life suddenly deviate
- Prevent valuable information from being overlooked by camera blind spots
- Minimize information loss during staff shift changes and while traveling
- Receive fact-data predictive alerts based on automated threat analysis
- Real-time 360 degree situational awareness anytime and anywhere
- Verify if the suspect was present at the time that the crime was committed
- Use the passively collected IMSI to track the movements of fleeing suspects

Detection > Collection > Identification > Recognition > Correlation > Verification
all this combined results in **factual digital evidence + intelligence.**
