

# **X•IMSI**

**by X-Sensor Technologies**

**X•IMSI is a small, portable, tactical IMSI + Wireless Attribute Collector. In addition to the full-spectrum IMSI Collection capabilities, it also collects WIFI + BLE spectrum packages.**

**Multi in One > GSM - EDGE - 4G LTE - 5G Ready + WIFI - BLE**

The X•IMSI is small, portable and modular. It starts with 1 channel, and is expandable with 8 cellular channels at the same time. With an operational range from five to one hundred meters. Upgradeable to 3,000+ meters.

# Highly Affordable + Portable IMSI Collector

The X•IMSI uses as base the PBIC (Proximity, Plug & Play, Portable – Baseband Identifiers Collector) and is designed to only collect the IMSI and other attributes.

Because privacy is of paramount importance to us, calls, messages and data are not intercepted. It purely collects the “Identifiers” (IMSI, TMSI, IMEI, etc.) based on catch and release principle. No Interception – Just Privacy-By-Design IMSI Collection.

**Collecting the “Identifiers” (IMSI, TMSI, IMEI, etc.) within the following spectrums:**

- **2G/3G**
- **4G LTE**
- **5G-Ready**
- **All-in-One**

## Detect moving vehicles and smart devices

The X•IMSI is a highly affordable miniature tactical IMSI Collector for deployment in multiple scenarios such as indoor, outdoor and body-worn use. Designed to be stand-alone, mobile and easily concealable with the objective of special surveillance and intelligence gathering.

Plug & Play deployable with a power bank or using the fixed infrastructure within just 5 to 10 minutes, and fully configurable remotely making the X•IMSI is a user-friendly tool for tactical units.

Developed as a multi-tool IMSI Collector which you can use to detect fast or slow moving vehicles along the road and which you can use during special operations.

Would you like to know more about the different X•IMSI use cases? Contact us.

X•IMSI - includes a comprehensive extensible web-based dashboard that is encrypted and securely connected to the on-site equipment. Within the user-friendly dashboard, alerts can be configured based on risk classifications, automatic correlations, pattern recognition or other settings. In addition, each X•IMSI unit can be configured and monitored from a single control panel.
