

X•Protect

by X-Sensor Technologies

X•Protect provides an extra layer of preventive and proactive protection around a person's premises and while on the move.

More people are threatened or feel threatened. The use of social media makes it easier than ever to find out a person's address. For the people who are threatened or are in a protection program, this increases the chance that things will go wrong.

Unfortunately, not everyone can be constantly 24 / 7 protected.

This is where X•Protect comes in, an addition to traditional security.

Are you aware of what is happening around you day and night?

We understand that due to the high workload, staff shortage and increased threats on the street, not everyone who feels unsafe or who is in a protection program can be provided with full-time Personal Protection and Security.

Prevent camera blindspots or prevent information from being lost during shift changes.

With X•Protect you reduce the need for more manpower and resources by automatically transmitting an alert when patterns of life deviate. Providing your officers with greater situational awareness which enhances the ability to act more proactively.

X•Protect – a Smart Plug & Play + User Friendly Comprehensive Sniffer that automatically transmits alerts when Patterns of Life deviate.

Providing a 360 degrees Situational Awareness

X•Protect: an addition to traditional security by monitoring the invisible radio frequency spectrum and collecting invisible attributes which are constantly transmitted by every type of device equipped with wireless transmission components.

Such as: Vehicle infotainment, Vehicle e-calling system, Vehicle GPS, Smartphones, Headsets, Earpods, Smart watches, wearables, cameras and so on.

Basically everything that everyone carries with them these days.

Increase Your Situational Awareness with X•Protect.
Available as a mobile, fixed, integrable or portable solution.

Detection + Identification + Correlation: BLE + WIFI + TPMS.
Upgradeable with License Plate Recognition + Cellular.

Designed to proactively protect people.

Within the user-friendly dashboard, alerts can be configured based on risk classifications, automatic correlations, pattern recognition or other settings that only alert an operator or officer in duty when truly necessary.

X•Protect is a water- and weather resistant discrete modular, easy integrable, security equipment that can be deployed both indoor and outdoor.
