

X•Scout

by X-Sensor Technologies

X•Scout – provides you an extra layer of intelligence collection, as an addition to your existing surveillance techniques.

Plug & Play + Portable + Tactical Intelligence Collector

X•Scout, a small, Plug & Play, portable, outdoor weather-resistant, tactical analytics solution. Designed to solve operational issues and respond to the needs of special units.

Additional Layer of Smart Tactical Equipment

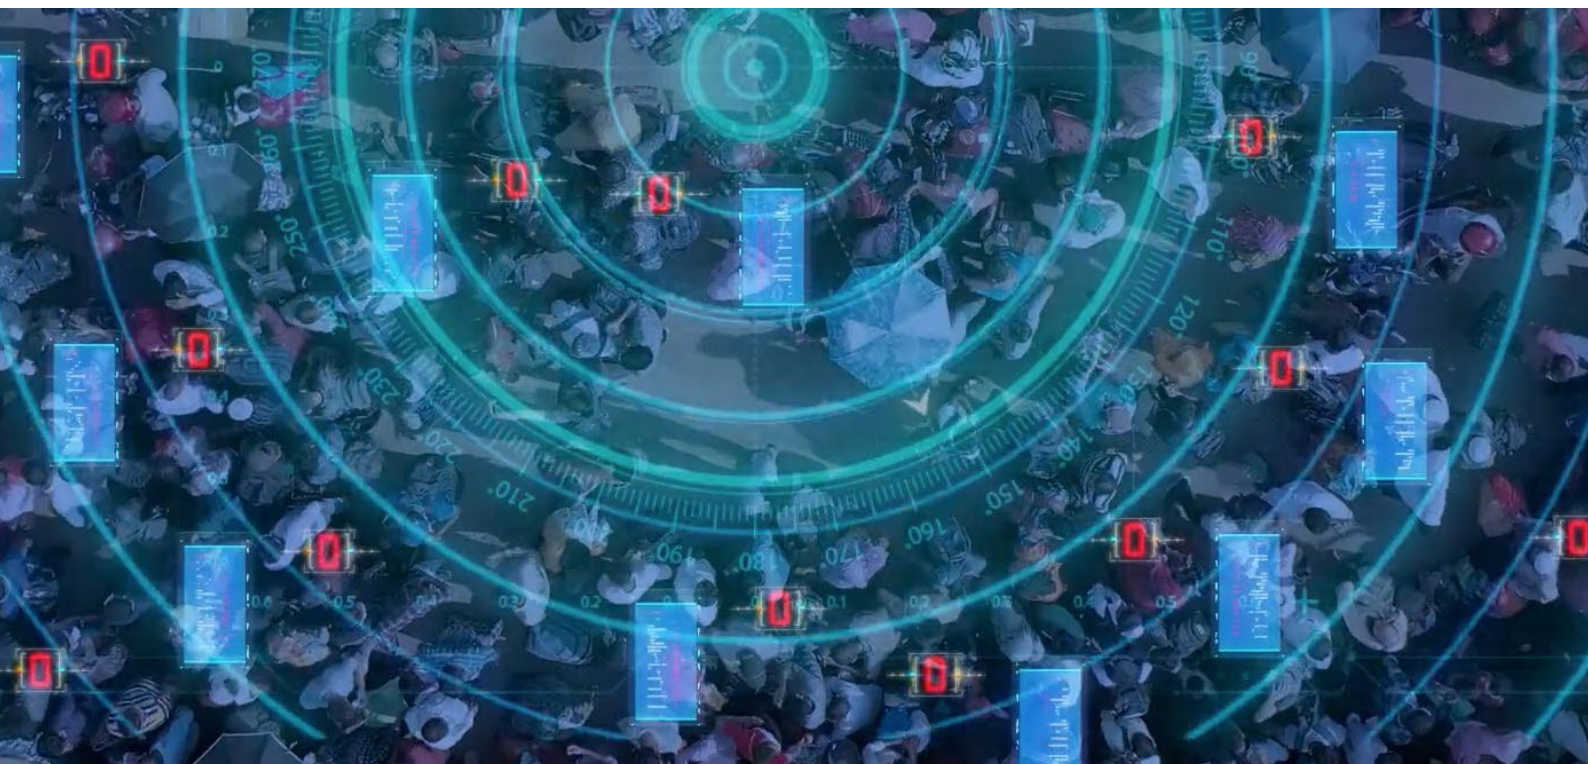

Collect additional – valuable invisible intelligence with X•Scout

Identifying targets based on visible and invisible collected intelligence. Alerting operators remotely when one or several targets are identified.

Discover which vehicles a suspect uses, with whom the suspect is meeting and gain more insight into his closed network. While preventing suspects from uncovering surveillance operations.

Available for close-proximity and long-range surveillance operations.

Even the power bank is modular, allowing the X•Scout to operate independently from the fixed infrastructure from 10 up to 100+ hours. In addition, the camera, sensors and antennas can be flexibly connected providing you the ability to widely use X•Layer indoor, outdoor, standalone, body-worn, discreet and camouflaged.

Simply select your modular components

Thanks to the sophisticated modular design, the X•Scout can be used with the intelligence collection techniques:

1. Capturing within the wireless spectrum: WIFI packets
2. Capturing within the wireless spectrum: BLE packets
3. Automatic License Plate Recognition
4. Automatic Gunshot Recognition
5. 6 Channel Multi IMSI Catcher
6. 4G LTE IMSI Collector
7. GSM IMSI Collector

Because special units have to pay attention to many things during a mission, we designed X•Scout so that it can be personalized to the needs of your unit. An average customized X•Scout model is operational within 5 minutes.

Designed to deploy swiftly in any type of situation.

An extra tactical layer for your special missions.

X•Scout - includes a comprehensive extensible web-based dashboard that is encrypted and securely connected to the on-site equipment. Within the user-friendly dashboard, alerts can be configured based on risk classifications, automatic correlations, pattern recognition or other settings.

Optionally, all intelligence can also be stored locally or transmitted periodically.
