## **Smart Reconnaissance**

### **An Additional Layer of Physical Reconnaissance with Smart Cyber-Physical Intelligence Collection.**

**Are you aware of what exactly 360° happening around you?  
unrecognizable / camouflaged / invisible**

Close Proximity:            1 > 50 ± meters

Short range:                50 > 150 ± meters

Mid range:                 150 > 300 ± meters

Mid+ range:                300 > 500 ± meters

Long range:                500 > 900 ± meters

Long+ range:               1,000+ meters

## X•Tactical Reconnaissance | Stand-Alone Deployable

- **Reconnaissance operations** - to obtain intelligence in the shortest possible time, inconspicuously and discreetly, about the activities and resources of an adversary within a rural and urban environment.
- **Counter-reconnaissance** - to prevent the opponent from monitoring your troops, whereby the scouts receive a real-time notification when they are observed inconspicuously and repeatedly.

Passive detection: GSM IMSI / TPMS / BLE / WIFI / LORA / Other  
Optional Active: Special Operations

Detection > Collection > Identification > Recognition > Correlation > Verification  
all this combined results in **factual digital (cyber-physical) intelligence**.
